

**surf** - design by the inch

# surf workstations

the ultimate in design & flexibility

SIS-USA has specialized in quality adjustable tables, frames and accessories for over 30 years. We know it's not always the product that we sell that makes the difference, but rather the solutions that we provide.

Workspace design must fit the space and the applications as well as adjust to fit the user. If it doesn't, then it's not the solution for you. When we created the **surf** line we weren't interested in offering the market another basic adjustable table- we were presenting our customers with **solutions** with **unlimited** reliability and **flexibility** (surf).

The virtual unlimited potential for clients to design a workstation is what makes the **surf** line unique. So grab a pen, surf your mind, and enjoy the freedom to design the ultimate workstation for your needs.

Privacy Panel

Genesis Arm

Wire Spiral

File Pedestals

CPU Mount

CPU Caddy

Shelf Storage

Overhead Storage

- **Full sit to stand range:** smooth 1.7"/second electric height adjustment from 24.5" to 51.5" with simple touch activated switch (programmable and digital switches also available)
- **Single cross-bar support design:** located behind the cantilevered legs for increased leg room and full depth file pedestal positioning
- **Horizontal wire management:** keeps wires neatly stored under desktop
- **Reconfigure Furniture:** keep 80% of your investment intact by changing tops and cross bars as opposed to the entire desk

Electric height range of 24.5" to 51.5"

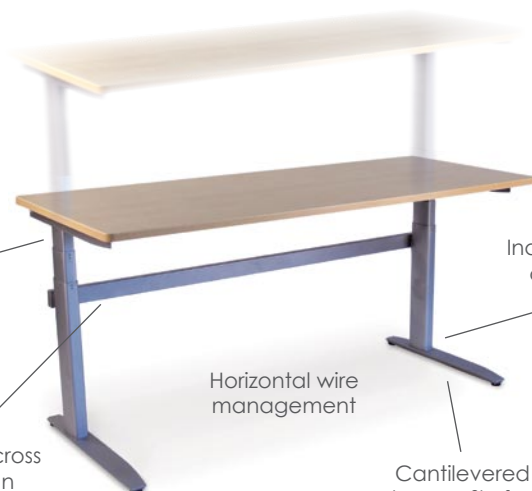

Manual adjustment option available for range of 24.5" to 35.5"

Single rear cross bar design

Horizontal wire management

Cantilevered leg and low profile foot design

Individual leg load of 150 pounds

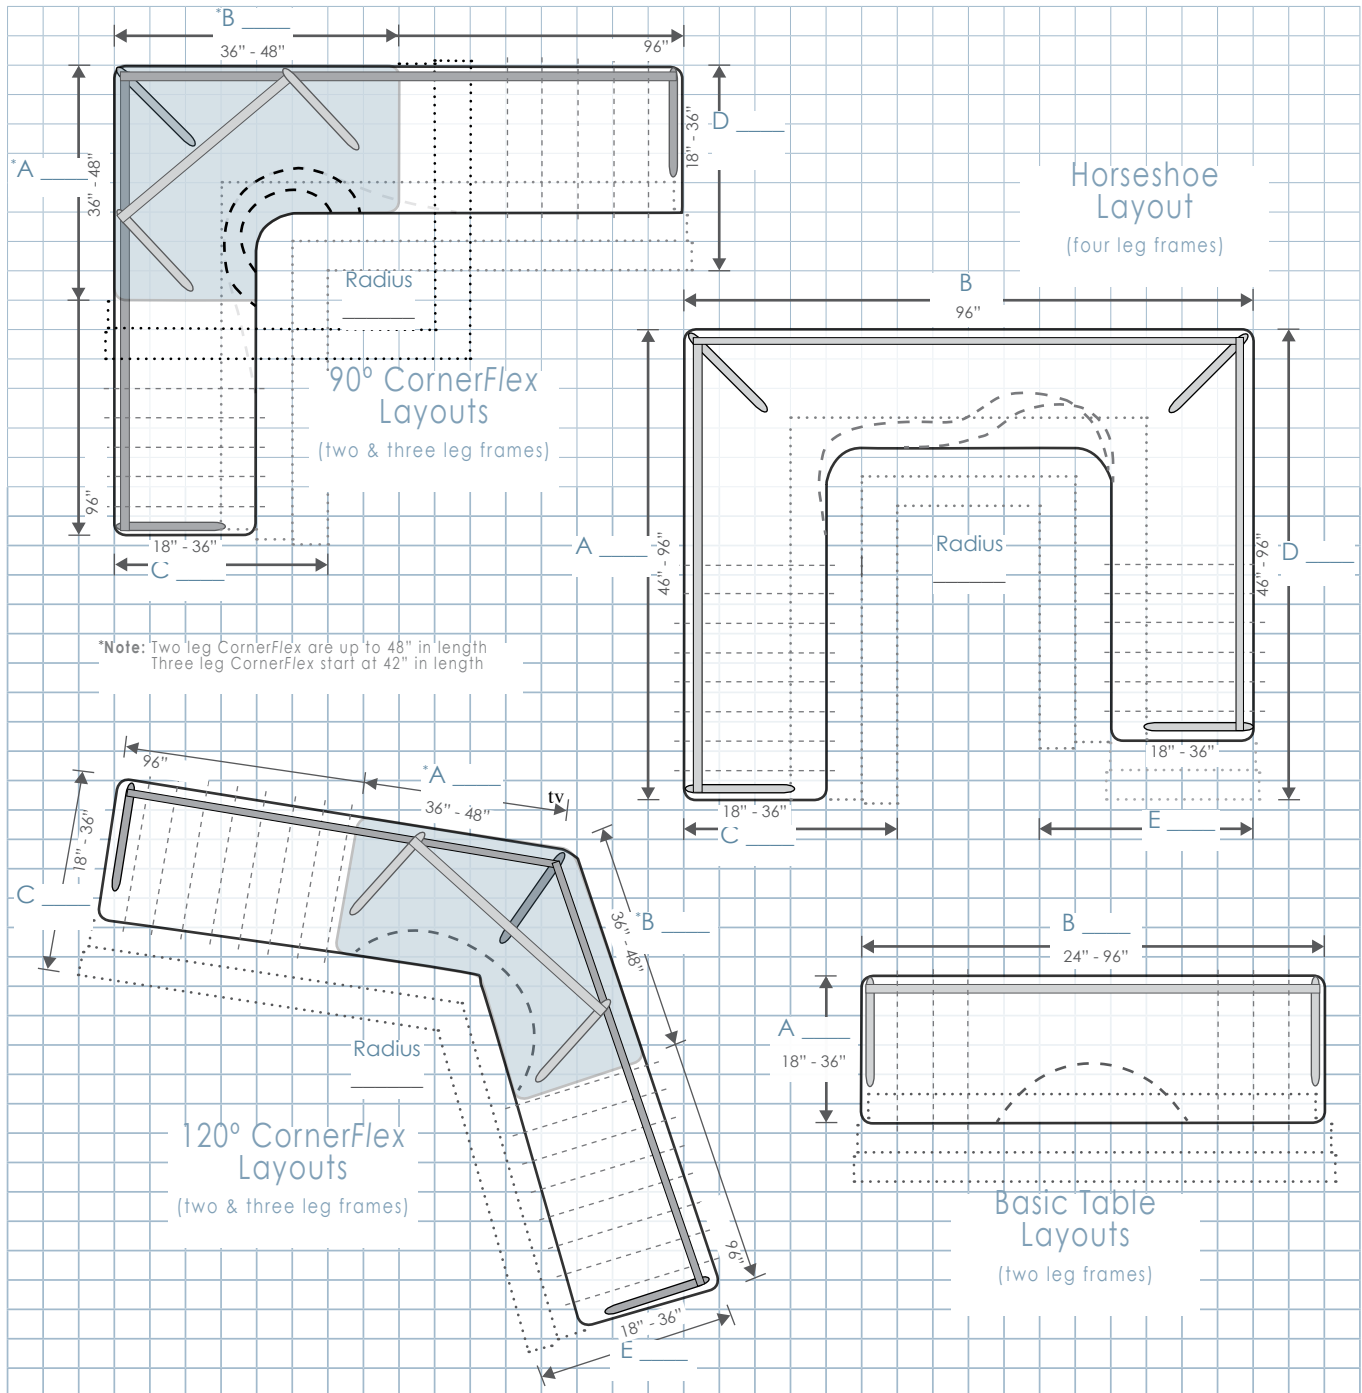

# designing surf

1. Note the dimensions of your workstation  
*(allow a 1" pinch point space around all moving parts)*
2. Trace the workstation shape to illustrate the size & shape of your workstation
3. Choose top and frame options

Don't limit yourself to modular sizes listed in a catalog- Surf tables are available in **1 inch increments** from 24 inches to 96 inches and surface depths starting at 18 inches. Tops can be shaped however you need them- including *(but not limited to)* designing around computer equipment or with cockpits to improve the user reach.
