Generation IV xtreme workstations are available with single or dual surface tops when fitted with spring adjustable keyboard units. Workstation designs include rectilinear models from 30" to 72", 42" and 48" corners, 72" corner combi's and full oversized cornerflex units.

**Single Surface - height range 24.5" - 51.5"**

Surfaces available either 24" or 30" deep and multiple widths.

**Duplex - height range 24.5" - 51.5" VDT /  $\pm$  6" Keyboard**

Just one crank handle or one motor raises both the computer and the keyboard surface simultaneously. The keyboard platform tilts  $\pm$  15°.

**Cornerflex - height range 24.5" - 51.5"**

Single surface or bilevel fully adjustable workstations in multiple sized configurations.

Generation IV computer support furniture adjusts to serve everyone. They meet or exceed all existing domestic and international standards for safety, durability and ergonomics.

Generation IV xtreme is distinctive in its exceptional range of motion. Adjusting quickly and easily from a sitting to standing position, it is the ideal computer solution for all office applications and especially those demanding advanced ergonomics and extensive flexibility.

- Available as full tables or frames that can be integrated with new or existing work surfaces.
- High durability and vertical horizontal integrity are assured through the use of steel constructed frames.
- Easy-glide casters are available for quick table re-arrangement or casual task groupings.
- Perforated privacy and modesty panels can be added for open space office concepts.

Spring adjustable keyboard mechanisms convert single surfaces to a duplex, dual surface workstation. The keyboard platform adjusts  $\pm 6"$  with a simple squeeze on the paddle and tilts  $\pm 15^\circ$ .

Unique support "beam" and leg design can be easily reconfigured to promote extreme flexibility. For example, a 72" workstation can be easily converted to a 42" corner table simply by changing the beam and tabletop. Add an additional leg to the extra beam to create another workstation.

Crank handle permits smooth easy adjustments at 3.25 revolutions per inch.

Electric motor smoothly raises and lowers the surface from 24.5" to 51.5" at the rate of 3.5 inches per second.

Generation IV xtreme workstations can accommodate users of varying sizes including petite, medium and tall, and is available in electric or manual crank models. Each xtreme workstation has these features and more;

- Perfect balance is maintained even when fully loaded up to 200 lbs. of computer equipment.
- Tapered foot reduces obstruction.
- Crank handle is conveniently located to minimize interference with adjacent walls or other work surfaces.
- Standard sizes fit into common panel environment schemes: 24" and 30" depths and 36", 48", 60" and 72" widths fit most work environments.
- Custom sizes available.
- Wire grommets available in the back of each workstation - you can choose the location.
- Combines well with generation IV basix to create a total office environment for private offices and open spaces.
